NGUYEN HUNG MANH

Hanoi, Vietnam • +84 392 389 623 • nhmanh.dev@gmail.com • LinkedIn • GitHub • Portfolio

SUMMARY

AI Engineer focused on building production-ready LLM, RAG, and agentic AI systems. Driven to develop scalable, reliable, and intelligent AI products that solve real-world problems and deliver meaningful impact.

EDUCATION

Thang Long University Hanoi, Vietnam
Double Bachelor's Degree in Artificial Intelligence and Computer Science Graduated Dec 2025
GPA: Artificial Intelligence 8.3/10 | Computer Science 8.2/10

SKILLS

AI & LLM and Agentic Systems: LangChain, LangGraph, Hugging Face Transformers, PyTorch, TensorFlow, Scikit-learn, Agentic Workflows, Fine-tuning, LLM Evaluation, MCP, A2A.
Backend & Infrastructure: Python, SQL, C++, FastAPI, REST APIs, Supabase, PostgreSQL, Vector Databases.
Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS.
MLOps & Deployment: Docker, CI/CD, Model Serving, Observability & Monitoring, Performance & Latency Optimization.
Languages: Vietnamese (Native) and English (Intermediate).

EXPERIENCE

VinSmart Future - PM Intern | Hanoi, Vietnam Sep 2026 - Present

- Support project planning, progress tracking, and coordination among stakeholders in AI projects.
- Conduct market and competitor research for the Express delivery service.
- Develop and maintain project documentation to support standardized project management processes.

Trung Anh Group - AI Engineer | Hanoi, Vietnam May 2026 - Jul 2026

- Built and deployed RAG chatbots for 20+ healthcare fanpages and 5+ doctors using LangGraph, Qdrant and n8n.
- Automated thousands of customer interactions across Facebook Messenger, Zalo OA, and personal Zalo accounts.
- Designed AI workflows for lead qualification, telesales routing and fragmented conversation recovery.

Appen - Data Annotator| Hanoi, Vietnam Jun 2025 - Apr 2026

- Labeled and annotated text, image, and audio datasets for machine learning model training and evaluation.
- Conducted data validation and quality assurance to maintain dataset consistency and accuracy.
- Contributed to improving AI model performance through high-quality annotated datasets.

PROJECTS

AI42E - AI Product Ecosystem | Website Jan 2026 - Present

- **VoiceStudio:** Developed an AI-powered text-to-speech application that has reached 500 users.
- **VideoAutomationSystem:** Developed an LLM-powered system to automate video production workflows.
- Developed end-to-end AI products, covering data processing, model integration, and application deployment.

AI Admissions Assistant (AI in Action Program - VinUniversity) | Demo Jul 2026 - Sep 2026

- Led the product development and launch, securing a Top 10 position among 250 teams at the Build Showcase.
- Built a multi-tenant AI Admissions Assistant using LangGraph, FastAPI, and Supabase with strict tenant isolation.
- Implemented an agentic RAG pipeline with Guardrails, semantic caching, and LLM fallback.

Legal Consultation & University Admission RAG Chatbot | Github May 2025 - Dec 2025

- Built end-to-end RAG systems for legal and university admission consulting using Gemini 2.5, FAISS, and FastAPI.
- Indexed 10,000+ documents into tens of thousands of chunks with hybrid retrieval.
- Applied advanced RAG techniques including Query Expansion, Multi-Query, Reranking, and Context Compression.

Additional Information

Passionate about mathematics and chess, with multiple secondary school awards and a university certificate for participation in scientific research.
Certificate of Excellent Completion — AI Thực Chiến Program, VinUniversity (2026).
